

Data Science Course: Data Wrangling

Mini-Project: API

Learning Objective

• Practice new data wrangling techniques.

Criteria	Meets Expectations
Completion	The code runs successfully.
Process and understanding	The submission shows that the correct solutions to the 6 mandatory problems are produced.
	The code in the submission is well commented
	The submission demonstrates understanding of each part of the solution.
Presentation	The project is delivered in a Jupyter notebook and uploaded to GitHub.
	The project doesn't contain any unnecessary printouts.

Excellence: Student solves the 7th optional task, uses list comprehensions in their code, and abstracts certain pieces of the solutions into separate functions (i.e. extracting the index of a data field).
